#### DEFINITIONS

**Social Economy [SME definition](#) in the Call for Proposal (SMP-COSME-2022-SEE): *Greening social economy SMEs and entrepreneurs in the proximity and social economy ecosystem through transnational co-operation.***

*99.9% of the companies in the Proximity & Social Economy (P&SE) ecosystem are SMEs, with a significant part being micro enterprises and start-ups. This ecosystem employs 22,9 million people and accounts for 6.54% of EU value added (EUR 791 billion). Actors of the proximity and social economy are pooled under this ecosystem given that they often share common characteristics (i.e. local anchorage and short value chains) although the features of these entities vary to a certain extent. In particular, this call will target social economy SMEs and entrepreneurs operating in this ecosystem, and will benefit proximity initiatives such as Local Green Deals but also support the development of sustainable practices (e.g. 15-minutes city, ecofriendly last mile delivery and short food supply chains) at local level.*

**Social Economy entities definition in the Social Economy Action Plan (Communication from the Commission 'Building an economy that works for people: an action plan for the social economy', COM(2021)**

*"The social economy covers entities sharing the following main common principles and features: the primacy of people as well as social and/or environmental purpose over profit, the reinvestment of most of the profits and surpluses to carry out activities in the interest of members/users ("collective interest") or society at large ("general interest") and democratic and/or participatory governance.*

*Traditionally, the term social economy refers to four main types of entities providing goods and services to their members or society at large: cooperatives, mutual benefit societies, associations (including charities), and foundations. They are private entities, independent of public authorities and with specific legal forms. Social enterprises are now generally understood as part of the social economy.*

*Social enterprises operate by providing goods and services for the market in an entrepreneurial and often innovative fashion, having social and/or environmental objectives as the reason for their commercial activity. Profits are mainly reinvested with a view to achieving their societal objective. Their method of organisation and ownership also follow democratic or participatory principles or focus on social progress. Social enterprises adopt a variety of legal forms depending on the national context."*
